---

## SOFTWARE ENGINEER

Full stack developer with experience in frontend and backend technologies such as Ruby, Rails, Javascript, and React. As a recent college graduate with a degree in Film and Communications, I discovered software engineering as a way to explore the more technical and scientific part of my brain. I bring strong skills in collaboration and teamwork as well as a passion for creativity in everything I do. My background working on film sets gives me an alternative perspective and experience working in high stress, deadline-driven, highly collaborative environments.

---

## TECHNICAL SKILLS

JavaScript (ES6), React, Ruby, Rails, Postgres, HTML, CSS

---

## TECHNICAL PROJECTS

### Moviestack - [Github](#) | [Demo](#)

Social media application that allows users to swipe through a stack of movies via a Tinder-like UI, voting yes or no on each, then inviting friends to do the same and returning a movie that both users liked, as well as functionality to enable users to create and edit their own custom stacks of movies.

- Implemented authorization utilizing JSON Web Tokens to encrypt account information for sign-up and login.
- Developed a Javascript/React frontend and Ruby/Rails/Postgres backend application.
- Used materialUI components to create a clean UI.

### FiveOClock - [Github](#)

Application for bartenders and cocktail enthusiasts that allows users to post custom recipes to be seen, liked, and commented on by other users.

- Built out a Javascript/React frontend and Ruby/Rails/Postgres backend application.
- Communicated with an external RESTful API to render searches for hundreds of different cocktails.
- Used semanticUI framework to create a clean and fluid user experience.

### Backseat Critic - [Github](#)

Application for film buffs to submit reviews and ratings for movies, as well as comment on other users' reviews.

- Engineered user interface using Javascript, React, and baseline CSS to improve user experience.
- Created a custom backend using Ruby on Rails and Active Record.

---

## EXPERIENCE

### Denison Film Society

Projectionist and Marketing Director

Grandville, OH

02/2018 - 05/2021

- Organized college-wide film screenings, directing hundreds of students and operating the adobe sound system and projector.
